Tech Skills

- HTML5
- CSS3 | SASS / BEM
- Mobile First
- GIT / GitHub
- Javascript | ES5 / ES6
- OOP
- REST
- Parsel / WebPack
- Handlebars
- React.js
- React Native
- SPA | CSR | React Router
- Redux
- Node.js
- Phaser 3
- Agile | Scrum / Kanban
- Figma
- Trello
- GTD
- OKR
- Personnel management skills

Soft Skills

- Attentiveness to details, scrupulousness, obligation
- Desire to explore, ability to learn quickly and efficiently
- Focus on results

Languages

- English - beginner (studying)
- Ukrainian - native
- Russian - native

Projects experience

1. Cake Decorations /GitHub link/ _____ [React/Node/Firebase]
   A commercial open source project for an online cake decoration store. It is under development! And you can watch the development of this web application in real time ☺

2. Book online store /GitHub link/ /Web Server link/ _____ [React/Node/Express/MongoDB]
   A single-page web application of an online bookstore that allows you to filter the selection of books with automatic calculation of the order amount.

3. Delivery app /GitHub link/ /Web Server link/ _____ [React/Node/Express/MongoDB]
   A single-page web application of a simple online store that allows you to select the necessary product from the proposed range in the right quantity with automatic calculation of the order amount.

4. Wallet app /GitHub link/ /Web Server link/ _____ [Team project ● React/Node/Express/MongoDB]
   A single-page application with an adaptive display for different sizes for storing transactions and the balance of the budget, which allows you to plan a personal or family budget: add, delete and filter income and expenses.

5. Phonebook app /GitHub link/ _____ [React]
   Personal phone book application for contact storage and managing phone numbers.

6. My Fantasy: Choose Your Story /GitHub link/ _____ [Phaser 3]
   Responsive interactive playable advertising using a game framework.

7. Filmoteka /GitHub link/ _____ [Team project ● JavaScript]
   A single-page application for finding, reading a description, watching a trailer and saving your favorite popular movies to your library. My contribution: providing API calls for creating a collection on the home page, search, trailer, genres; rendering of movie search by keyword; layout and connection of application elements.

8. Image Finder /GitHub link/ _____ [JavaScript]
   A small application for searching and viewing images by keywords using API requests to the photo stock Pixabay.

9. Ice Cream /GitHub link/ _____ [Team project ● HTML5/CSS3]
   Group project where I was as a developer was responsible for the gallery section and reviews section. Also, my responsibility was to connect the jQuery library and the Slick Slider plugin.

10. WebStudio /GitHub link/ _____ [HTML5/CSS3]
    A starter project for a Multi-page Application with responsive layout.

Work experience

FrejaTECH
